DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 6/19/07 has been entered.

Information Disclosure Statement

2. The information disclosure statement filed 6/19/07 has been received and made of record. Note the acknowledged form PTO-1449 enclosed herewith.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3772

4. Claims 13 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Application Publication No. 2004/0054311 ("Sterling").

As regards claim 13, Sterling discloses an anatomically designed orthopedic knee brace that inherently anticipates applicant's presently claimed invention. More specifically, Sterling discloses a method for treating a knee pathology comprising, altering an abnormal rotation of the tibia, wherein said altering involves applying a rotational force to the tibia during flexion in a direction opposite to that of said abnormal rotation, and applying an off-loading force to the knee, wherein said rotational force and said off-loading force is applied repeatedly during every flexion/extension

As regards claim 18, the knee discussed in Sterling is an osteoarthritic knee (para. 0026).

Allowable Subject Matter

5. Claims 1-12, 19 and 20 are allowed.

6. Claims 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
